Sales Compensation Analyst

Detail-oriented Technical Analyst and UNC-Chapel Hill Computer Science graduate specializing in Sales Performance Management (SPM). Expert in executing complex backend configurations, data pipeline integration, and quality assurance for CaptivateIQ commission deployments. Leverages a strong foundation in SQL, Python, and data automation to build scalable compensation architectures that drive RevOps efficiency.

CORE SKILLS

Incentive Comp / SPM: CaptivateIQ · commission & bonus administration · payout auditing & controls · SPIFF programs

Data & Analytics: SQL (BigQuery) · Python · R · ETL pipeline automation · Excel modeling · data validation & reporting

Delivery: requirements gathering · stakeholder discovery · UAT / testing · go-live support · documentation

EXPERIENCE

Founding Associate Consultant | Variable Sync | Durham, NC 04/2026 – Present

- Translate Go-To-Market strategy and detailed plan documents into actionable system rules, configuring complex crediting logic, quotas, and variable incentives within CaptivateIQ and other enterprise Incentive Compensation Management (ICM) platforms
- Manage the ingestion, transformation, and validation of large-scale transactional data pipelines to support RevOps objectives, maintaining accurate backend data schemas, user hierarchies, and territory alignments
- Conduct end-to-end quality assurance and unit testing within an agile SDLC framework, debugging calculation errors to ensure zero-defect, SOX-compliant commission deployments
- Partner with lead consultants to implement scalable SaaS technical architectures, standardizing internal build processes and authoring comprehensive configuration guides to ensure long-term system continuity
- Leverage agentic AI tools (Claude) to accelerate configuration audits, streamline legacy-engine reconciliation, and drive internal process innovation during complex technical builds

Data Science Intern | Wine to Water | Boone, NC (Remote) 01/2026 – 04/2026

- Engineered a scalable Google BigQuery database with a custom AppSheet front-end and automated logic bots to eliminate user error
- Built an automated Python ETL pipeline to consolidate source data into a central database
- Led stakeholder discovery interviews to gather requirements and translate team needs into technical solutions

Executive Assistant | PlayNC | Durham, NC 08/2022 – Present

- Manage a team of staff in organizing weekly games that have raised over \$10,000 for local charitable causes

EDUCATION

University of North Carolina at Chapel Hill | Chapel Hill, NC 05/2026

B.A. Computer Science — Minor in Data Science and History

- Relevant coursework: Data Structures, Discrete Structures, Computer Organization, Artificial Intelligence, Foundations of Software Engineering

PROJECTS

Drinko | Swift, SwiftData, Git, Claude 06/2026

- Built a full-featured iOS app for social drink tracking with a real-time BAC estimator (Widmark formula via HealthKit inputs), a tournament bracket engine, and a subscription model

AIInterviewer | Python, TypeScript, HTML, CSS 05/2025

- Co-developed a full-stack web platform integrated into the UNC Computer Science site, delivering AI-powered feedback and hints for technical interview practice

ACTIVITIES & HONORS

- **Pi Kappa Phi Fraternity, UNC-Chapel Hill** — Philanthropy Board Member (2024–2026)
- **Carolina Data Science Club, UNC-Chapel Hill** (2024–2026)
